CC: "Pete Hess" <petehess@utah.gov>, "Hansen, Chris" <CHansen@archcoal.com>, ... Pam,

The amendments delivered on Monday are Degas Well G-19 and an archeology report to be processed through SHPO by the Division.

Project #1

We would like to start drilling the G-19 degas well August 6th. The mine will be under the well site the 1st of September. The well needs to be completed quickly to release gas, relieve safety concerns and allow mining.

With G-19 we have added a new drillhole location due to unexpected amounts of methane encountered during development mining. During the winter of 2006 we scouted several areas for potential pads sites in case excessive methane was encountered, this is one of those sites.

The drawings you have seen previously showed G-19 in another location, we have moved and used this number to follow the number sequencing.

There is still another degas well amendment coming which includes two more pads and a road segment which will need approval for drilling in September and October.

We would like to start the road segment immediately.

We can discuss timing further once I get the amendment into the Division. I am awaiting final drawings and vegetation report from the consultants on the road segment and the two drill pads.

Project #2

The archeology report needs to be processed and clearance given by October 2007. This archeology report contains the discovery of an incomplete arrowhead found on a well pad site to be drilled in 2008. We plan on permitting the 2008 drilling in October/November 2007.

If you have any additional questions, please contact me. Thanks, Vicky

Hi, Chris and Vicky - We got two "big" projects in the queue before you....

What is the timing on this project? Please let me know..

thanks.
